

How to customize the color of the command prompt

(Ubuntu 18.04)

Step 1: select the color you want

The web page of the video is available at:

https://en.wikipedia.org/wiki/ANSI_escape_code

Step 2: copy the file ~/.bashrc and edit it with nano

```
cp ~/.bashrc copyBash
```

```
nano ~/.bashrc
```

Step 3: edit the color

In nano editor:

Ctrl + w

type: host

got to first PS=1 line (as shown in the video)

edit the color: in our case it was [01;38;5;36m\]

save: Ctrl + o

exit: Ctrl + x

Step 4: Load bash to see the result

```
bash
```

Step 4: delete all \w in the 3 lines PS1= and save

Step 5: Load bash to see results

bash
